

"Existence I: Contemplation"

Entry:

They were fading away
Only ashes and smolder
Millions of years
Millions of worlds [x2]

Verse:

Essence of life a mystery

No present reality, for a future to exist

Life is for existence
Present is for future
You can throw everything away
When you aren't sincere
When you're not ready: All that you have will be taken away

Life is for existence
Present is for future
Life is for existence
Present is for future [x2]

"Existence II: Collision"

Entry:

Stay and wait for me

Verse 1:

Stay and wait for me
There are so many things I want to say
But haven't yet
Call from the void
Call of the instinct from the wastelands of your inner mind

We've ruined your future
There is no hope in faith
You're born free
It's time to pay your debt
And everyone will forget about his conscience
Then it's time to choose: to live or to die

Verse 2:

But you are all already dead
But there's still a chance to rewrite fate
Show who you really are
And become a part of absolute will

Strength means nothing
Those that are weak
Men not honest with themselves
Don't be afraid of your feelings
Singularity is not a vice

Chorus 1:

There are no dreams no future no past
The price that I have to pay
For ideas, I will never believe

Verse 3:

Stay and wait for me
There are so many things I want to say
But haven't yet
Call from the void
Call of the instinct, from the wastelands of your inner mind

You'll face your fears, you'll not see the light

Through infinite years, of your miserable life
Mental and physical sparks unite
And collision has now taken
Your right to decide

Chorus 2:

They were fading away
Only ashes and smolder
Millions of years
Millions of worlds [x4]

Verse 4:

But you are all already dead
But there's still a chance to rewrite fate
Show who you really are
And become a part of absolute will

Strength means nothing
Those that are weak, men not honest with themselves
Don't be afraid of your feelings
Singularity is not a vice

"Abolution"

Verse 1:

From scratch a million years
In the previous experience
The rising, evocation of a dream
Of an ultimate existence

Future turned reality
A crystal insight. No compromise
The world of an universal will
General will

Verse 2:

Timeless machine of life
For those who don't dream
Aimless, without pain nor fear
Survival is a main purpose

No more silly mistakes
Blood frozen in their veins
Evolution, reached it's peak
Now begins a new golden age

Chorus 1:

We've built the life on murderers graves
It's pure (it's pure)

Verse 3:

Temple of the light
And each is a part of a mechanism
Harmony, profound of peace

Chorus 2:

We've built the life on murderers graves
It's pure (it's pure)

"Simulacra"

Who's there?
I'm so tired,
Leave!
I cannot explain what is happening
Not even to myself
Tell me, what makes you to wake up?
Questions we could not get past

Don't leave your bed
Keep the door shut
There's nothing for you to look for [x2]

There's nothing for you to look for

Tell me, what makes you to wake up?
You won't survive

There's nothing for you to look for

“Footprints in the Sand”

Verse 1:

You don't belong
To who you once were
Everything has changed
By staying the same

It's not enough
That you've seen the prison walls
Footprints in the sand
Make me believe
That I exist

Verse 2:

This is only the beginning
The world doesn't deserve anything you give. Wake up!
Before it's too late to escape becoming
Another nail in this coffin

Everything has changed
By staying the same

Verse 3:

Step by step
I am still running
Through a labyrinth of doors I have already entered
Is this my voice?
The water it rises
Will I regret starting this nightmare

Chorus 1:

Open your eyes
You only can see [x2]

There is no cure [x2]

Verse 4:

There is no cure
Cause you carry the virus
You try to resign yourself
Or let the rats
Pick bones from your face

Verse 5:

This is only the beginning
The world doesn't deserve anything you give. Wake up!
Before it's too late to escape becoming
Another nail in this coffin

Chorus 2:

Open your eyes
You only can see [x2]

Everything has changed...

"Beyond"

Entry 1:

I left
A temporary barrier behind
Into the unknown without hesitation
I inhale the air
Which was beyond

Verse 1:

I don't regret and know what I want
Got my hands out of dirt
Dust in eyes not for those who can't lie
I was made to explore

No more borders free of all chains
An infinite journey to the truth
Wretched worms are behind
A destiny up to you

Chorus 1:

My world is too small for me
I'll never escape from this glass

Verse 2:

I've already seen this plot
Worlds of jealousy and ambition
Roll this boulder up again and again
Prison of someone's creation

Then the universe shows it's real face
Decorations become a wall
A wall that I can never reach
And there's nowhere I can go

Entry 2:

I left
A temporary barrier behind
Into the unknown without hesitation
I inhale the air
Which was beyond

Verse 3:

Everything that surrounds me is mind creation

My independence is under control
Endless stairways of imagination

Feel only blackness
In this horizon of events

All I've ever been
nothing like the links
Prospectives of a world that no longer exists

No exceptions in the universe law

Just memories in another dimension

All I've ever been
nothing like the links
Prospectives of a world that no longer exists
No longer exists

My independence is under control

Chorus 2:

My world is so small for me,
I'll never escape from this glass [x2]

"Limbo"

Verse 1:

So cold, so dark, so quiet
The place you've never been before
Pictures from the past
The only law

I know it looks so scary
But soon it feels like home
Don't let it get you down!
You're used to being alone

Chorus:

And all these dirty walls
You want razed to the ground
They are the flash you made of
The only path

Verse 2:

So cold, so dark, so quiet
It's the shade you've always tried to hide
The last outpost of
Let it warm you up

Chorus:

And all these dirty walls
You want razed to the ground
They are the flash you made of
The only path

"Immersion"

Verse 1:

I'm begging you to leave your past
To stay away from someone's dreams
They make you think that it's your own
It's just a box that's built for you
I'm not asking to be a speck of dust
I'm asking you to stop being deaf

Become an island in the sea
It's time to throw away your mask

Immersion

Verse 2:

In search of light
You've put the fire out
Your fears based on your lie
Lie to yourself [x2]

In search of light
You've put the fire out
Just a stone in the dark
The longer road is always safer

Chorus 1:

The creator gave you what you already had
To put chain of love on your neck
To make you play in "Life and Suffering"
Nobody wants to be a slave
But everyone wants to have a fate
But it is you, who plants a tree

Verse 4:

How can you tell that pain is bad?
They make you believe that blood is red
You're just a reflection [x2]
Accept the truth about who you are
All you can do is to open your eyes
You, your only ally
Scramble these parts of you

Chorus 2:

The creator gave you what you already had
To put chain of love on your neck
To make you play in "Life and Suffering"
Nobody wants to be a slave
But everyone wants to have a fate
But it is you, who plants a tree

Verse 5:

They make you think that it's your own
It's just a box that's built for you
I'm asking not to be speck of dust
I'm asking you to stop being deaf

It's time to throw away your mask

Immersion [x5]

"Awakening"

Verse 1:

It's the time to leave your mark
To pave the way to distant dreams
Reveal horizons to ideas
To look into infinity

Ready to disappear torn apart
Forget and be broken to the pieces
Awakening yourself from unreal dream
To feel your heartbeat

Chorus 1:

Fire, that guides the way
Day, divides the night
We're in search of a new sign

You hear the birth of the day
You feel dissolving

You have to deal with all of your fears
To feel your breath

Verse 2:

Do you see how the world is changing?
You hear the birth of the day
Your mind is waiting for the questions
You feel dissolving

Awake yourself from the eternal dream
Deal with your fear
